ISBN-13: 978-1912636457 (Paperback)

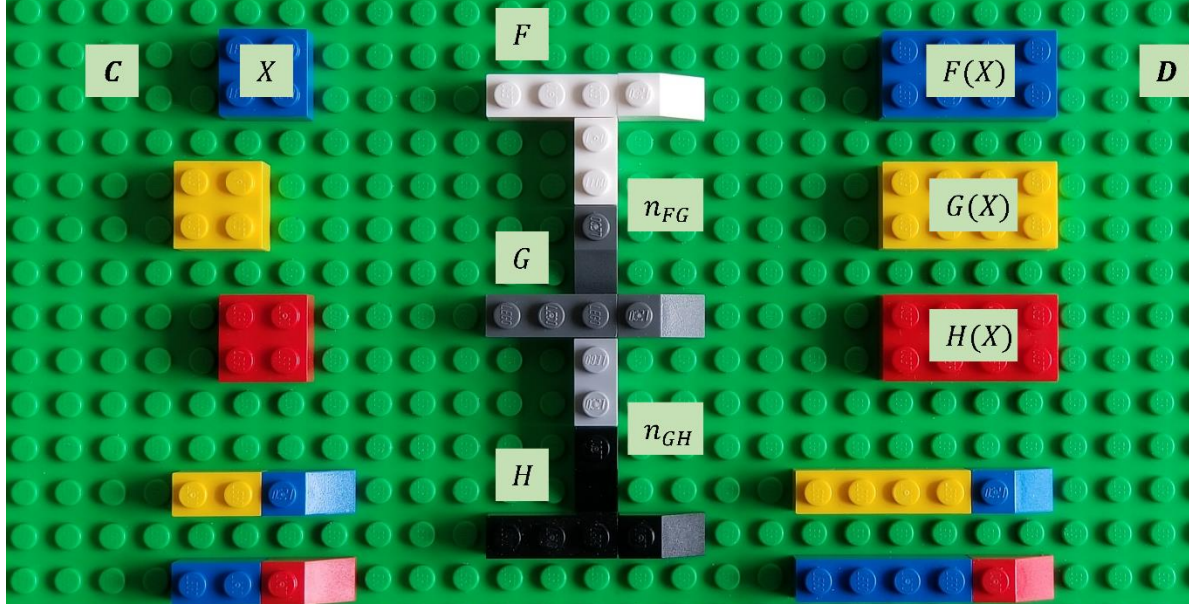

Revision 1.01 (June 2020)

In *Part<sub>1</sub>* we introduced natural transformations between functors. Natural transformations can be “vertically” composed.

$F, G, H : \mathbf{C} \rightarrow \mathbf{D}$ ,  $X \in \mathbf{C}$ ,  $F(X), G(X), H(X) \in \mathbf{D}$

$n_{FG} : F \rightarrow G$ ,  $n_{FG}(X) : F(X) \rightarrow G(X)$ ,  $n_{GH} : G \rightarrow H$ ,  $n_{GH}(X) : G(X) \rightarrow H(X)$

$n_{FH} = n_{GH} \circ n_{FG} : F \rightarrow H$ ,  $n_{FH}(X) = n_{GH}(X) \circ n_{FG}(X) : F(X) \rightarrow H(X)$

In addition to 12 books mentioned in *Part<sub>1</sub>*, *Part<sub>3</sub>*, *Part<sub>4</sub>*, and *Part<sub>5</sub>* we also used:

- Iconicity and Abduction by Gianluca Caterina and Rocco Gangle
- Directed Algebraic Topology: Models of Non-Reversible worlds by Marco Grandis

## Index for Part<sub>1</sub>-Part<sub>6</sub>

Name	Part	Pages
2-category	1	16
Adjoint equivalence of categories	6	9
Adjoint functors	3	3,4,5
Arrow category	4	8,9
Biproduct	2	10
Category of cones	3	9
Category of matrices	4	3
Category of morphisms	6	11
Category of pointed sets	2	14
Category of presheaves	6	15
Category of subobjects	5	10
Cocone	3	8
Coequalizer	5	14,15
Colimit	3	11
Cone	3	7
Congruence category	5	16
Contravariant functor	1	11,14
Contravariant morphism functor	6	14
Contravariant representable functor	6	16
Coproduct (sum)	2	7,8,9
Coslice category	4	12
Covariant functor	1	11,13,14

Covariant morphism functor	5	17
Covariant representable functor	6	13
Definition of category	1	4,5,6,7,8
Diagram shape	3	6
Dual (opposite) category	4	7
Duality	2	3
Epimorphism	4	15
Equalizer	5	11,12
Equivalence	1	10
Equivalence of categories	6	8
Equivalence relation	5	13
Exponential and evaluation functions	5	6,7,8
Exponential of objects	5	9
Extension	2	3
Forgetful functor	4	13
Function of sets	5	4,5
Functor category	6	10
Functor identity	6	5
Group category	4	6
Group object	4	5
Initial object	2	11
Isomorphism	4	16
Isomorphism of categories	6	7
Isomorphism of functors	6	6
Lifting	2	3

Limit	3	10
Matrix representation of arrows	2	15
Monoid category	4	4
Monoid object	4	5
Monoid operation	2	16
Monomorphism	4	14
Natural transformation	1	15
Pointed category	2	13
Presheaf	5	18
Product	2	4, 5, 6, 8
Pullback	3	12, 13, 16
Pushout	3	14, 15, 17
Natural transformations as functors	6	12
Retraction	1	9
Section	1	9
Slice category	4	10, 11
Terminal object	2	12
Vertical composition of natural transformations	6	3
Whisker composition of natural transformations	6	4
Yoneda embedding	6	17, 18
Yoneda lemma	6	19
